# HTML Exercises

1. Basic HTML - `hello_world.html`

   Curriculum Sections

   - 1
   - 1.1
   - 1.1.1 - 1.1.6

2. HTML Forms - `my_first_form.html`

   Curriculum Sections

   - 1.2
   - 1.2.1 - 1.2.4

# If you've finished the exercises in the curriculum...

1. Pizza Ordering Form

   Create an html form for ordering a pizza. It should at least have

   - input field for your email
   - checkboxes for toppings
   - radio buttons for pickup or delivery
   - a select dropdown for type of crust

   but you can be as creative here as you like.

# If you've finished the exercises in the curriculum...

1. Coffee Bean Order Form

   Create an html form for ordering coffee beans. Include:

   - type of roast (dark or light)
   - quantity
   - a checkbox for signing up for auto renewal
   - input elements for entering the address for where the beans are to be delivered

# If you've finished the exercises in the curriculum...

1. Reddit Search

   Build a form where a user can enter a search term and when the form is submitted, they will be taken to reddit with the results of their search

   **Bonus**

   - When the user views the search results they should be sorted by 'top'
   - Create a select dropdown that allows the user to sort results by 'relevance', 'top', or 'new'

2. Amazon Search

   Build a form that allows a user to search amazon
